

Aison Silan Cabusay

Application Developer Sr. Analyst | Java Spring Boot Developer | VB.NET & SQL Developer

■ +63 9762425947 | ■ cabusayaison@gmail.com | ■ aisoncabusay.github.io/aisoncabusay

Professional Summary

Experienced Application Developer with strong expertise in Java Spring Boot, VB.NET, SQL Server, MySQL, and Arduino-based systems development. Proven track record in designing and maintaining production systems, automation tools, and enterprise applications for manufacturing and global IT environments. Experienced in full system development lifecycle including backend development, database management, testing, troubleshooting, and process optimization. Strong background working with multinational companies including Accenture and Furukawa Automotive Systems.

Technical Skills

Backend	Java SE, Spring Boot, VB.NET
Frontend	HTML, CSS, React JS
Database	MySQL, SQL Server
Tools & Platforms	GitHub, AWS, Power BI, Power Automate, AppSheet
Design Tools	Adobe Photoshop, Adobe Illustrator, SketchUp
Hardware & IoT	Arduino, TinkerCAD

Professional Experience

Sr. Advisor II, Technical Support — Concentrix Bridgetowne

June 2026 – Present

- Provided client-based and customer support using email and ticketing system.
- Provide support to TikTok Signal API.
- Collaborated with global teams in delivering technical solutions and support.

Application Developer Sr. Analyst — Accenture Japan Ltd., Yokohama, Japan

June 2025 – April 2026

- Provided client-based support under the Global Career Program (GCP).
- Worked on enterprise application development and maintenance.
- Collaborated with global teams in delivering technical solutions and support.

Application Developer Analyst — Accenture Philippines

March 2022 – June 2025

- Developed and maintained systems using Java Spring Boot.
- Performed testing, debugging, and business analysis for enterprise applications
- Collaborated with cross-functional teams to improve application performance and stability.

Direct IT Developer — Furukawa Automotive System

June 2020 – March 2022

- Designed and developed internal systems using VB.NET, MySQL, SQL Server, and Arduino.
- Created automation and monitoring solutions for production operations.
- Maintained software infrastructure and supported production environments.

HR Admin / Recruitment Staff — Service Resources Inc.

June 2019 – May 2020

- Facilitated recruitment processes and managed HRIS encoding.
- Handled employee concerns and coordinated with client companies.

Key Projects

Jig Alignment Detection System (VB.NET and Arduino)

Production alignment detection system using VB.NET, MySQL, SQL Database, and Arduino.

PE Document Viewer (VB.NET)

Document management and search system for production engineering documents.

Employee Masterfile System (VB.NET)

System for monitoring and uploading employee information.

Machine Running Time Record (VB.NET and Arduino)

Machine monitoring system tracking downtime, stop/start events, and process runtime.

Parts Picking System (VB.NET and Arduino)

Production support system designed to reduce wrong-part incidents and customer complaints.

IQC / QA System (VB.NET)

Incoming quality control monitoring solution for manufacturer parts inspection.

BayaniAct (Android base) * Freelance Project

System for barangay that uses Geomapping, API and Email service integration. This help the barangay and residents to report incident, file a complain and request a public document. This Application uses java API as and runs in AWS.

Education

Bachelor of Science in Information Technology

Lemery Colleges | 2015 – 2019

Relevant Thesis: Motorcycle Starter using RFID with Motorcycle Alarm — Main System Developer

This resume was professionally formatted to highlight technical expertise, enterprise development experience, and software engineering accomplishments
